EDUCATION

Carnegie Mellon University, Robotics Institute — Pittsburgh, PA

- M.S. in Computer Vision | Cumulative GPA: 4.06/4.3 — Aug 2019 – Dec 2020

Beihang University, School of Software Engineering — Beijing

- B.E. in Software Engineering | GPA: 88.1/100, Overall Ranking: 6/149 — Sep 2015 – Jun 2019

SELECTED PUBLICATIONS

[1] Zhuoqian Yang*, Wentao Zhu*, Wayne Wu*, Chen Qian, Qiang Zhou, Bolei Zhou, Chen Change Loy, "TransMoMo: Invariance-Driven Unsupervised Video Motion Retargeting," accepted in CVPR 2020. * denotes equal contribution.

CAPSTONE PROJECT

Semantic Facial Image Manipulation using 2D/3D Modalities, *Sponsored by Fujitsu*

Supervisor: *Dr. Laszlo Jeni* — Ongoing since Feb 2020

- Building a GAN-based framework for FACS-based expression manipulation of photorealistic face images.
- Exploring linear and non-linear 3D morphable models to establish semantic correspondence in 2D facial images in an end-to-end manner.

EXPERIENCE

SenseTime, Research Intern — Beijing

TransMoMo: Invariance-Driven Unsupervised Video Motion Retargeting

Supervisor: *Wayne Wu* — May 2019 - Nov 2019

- Designed an autoencoder framework to learn latent representations of human motion from unpaired videos.
- Achieved unsupervised representation disentanglement by exploiting invariance properties of three orthogonal factors of variation including motion, structure, and view-angle.

RESEARCH

Scene Graph Reasoning with Prior Visual Relationship for Visual Question Answering

Supervisor: *Assoc. Prof. Zengchang Qin* — Jul 2018 - Dec 2018

Intelligent Computing and Machine Learning Lab, Beihang University Beijing

- Designed a graph neural network approach to enable agents to reason visual relationships on scene graphs.
- Introduced prior knowledge of visual relationships via visual relationship metric learning. A deep semantic space constrained by visual context and language priors is learned for visual relationships.

Multi-Temporal Remote Sensing Image Registration Using Deep Convolutional Features

Supervisor: *Assoc. Prof. Yang Yang* — Jan 2018 - Apr 2018

Engineering Research Center of GIS Technology in Western China, Yunnan Normal University Kunming

- Proposed a VGG-pyramid feature based multi-temporal remote sensing image registration method.
- Improved RMSE by 20% on remote sensing images with temporal appearance changes.

Non-rigid Image Registration with Dynamic Gaussian Component Density and Space Curvature Preservation Supervisor: *Assoc. Prof. Yang Yang* — Mar 2017 - Dec 2017

Engineering Research Center of GIS Technology in Western China, Yunnan Normal University Kunming

- Designed a dynamic Gaussian component density to progressively exploit available image information and provide sufficient credible correspondences for image registration.
- Devised a space curvature preservation to improve the plausibility of estimated transformation.

AWARDS & SCHOLARSHIPS

- First Prize Scholarship for Academic Performance (Top 5%), Beihang University — Dec 2016
- Excellent Student, Beihang University — Dec 2016
